

14 durante

In English *durante* is *during* but in many cases it is also *for*

So we use *for* and a period of time to say how long something goes on

So *for two hours*

*We worked for two hours yesterday*

*for a week*

*I was sick for a week*

We use *during* and a noun to say when something happens but we don't know how long

*I met my friend Peter during the week*

We don't know the specific time or how long but at some point in this week here.

*He fell asleep during the meeting*

So again at some point we don't know when we don't know for how long, but at some point in the meeting he fell asleep.

Common mistake

~~*We worked during two hours last week*~~

So as I have shown you:

*It's we worked for two hours last week*

~~*I was sick during a week*~~ so *I was sick for a week*
